

SHUBHAM WAGHMARE

Cloud & Information Security Engineer

+91 89563 13168 · daybuwaghmare@outlook.com · github.com/D5BU · linkedin.com/in/dfivebu · d5bu.github.io
Open to Work · Full-Time · Internships · Freelance · Pune / Remote

EDUCATION

B.Tech — Cloud Technology & Information Security

Expected July 2026

Ajeenkya DY Patil University, Lohegaon, Pune

TECHNICAL SKILLS

Cloud & Infrastructure AWS (EC2, VPC, IAM, S3, CloudTrail), Cloud Architecture, AWS CLI

Security IAM Hardening, OWASP Top 10, Network Penetration Testing, Vulnerability Assessment, Packet Inspection, Linux Hardening

Infrastructure & DevOps Terraform, Docker, Kubernetes, CI/CD, GitHub Actions, GitOps

Systems & Networking Linux, TCP/IP, DNS, OSI Model, System Administration

Languages & Frameworks Python, Flask, JavaScript, HTML5, CSS3, Bootstrap 5, TensorFlow, Keras, NLTK, SQL (SQLite)

Cryptography & Steganography LSB Steganographic Hiding, cryptographic tool development

PROJECTS

AWS IAM Auditing & Cost Optimisation Pipeline

2025 – 2026

Python · AWS IAM · Boto3 · AWS CLI · Bash

- ▶ Designed and automated an end-to-end cloud resource auditing pipeline that identified and pruned inactive AWS IAM roles and stale credentials across a multi-service AWS environment.
- ▶ Reduced the cloud attack surface by 70% by eliminating over-permissioned and orphaned IAM principals, directly improving the organisation's security posture.
- ▶ Delivered a 15% reduction in monthly AWS infrastructure costs by decommissioning unused resources flagged during the audit cycle.
- ▶ Built automated reporting scripts in Python using Boto3 that generated timestamped audit logs and remediation reports, cutting manual review time from hours to minutes.

D5BU Shield — Cybersecurity Desktop Suite github.com/D5BU/D5BU-Shield

2024 – 2025

Python · CustomTkinter · SQLite · WMI · Multi-threading

- ▶ Built a full-featured professional cybersecurity desktop application serving system administrators and security analysts, featuring real-time system monitoring, active network scanning, and physical device intrusion detection.
- ▶ Architected a multi-threaded, object-oriented backend with a 3-layer design (GUI · Modules · Data Persistence), enabling asynchronous network I/O and system registry calls without UI blocking.
- ▶ Implemented cryptographic steganography (LSB hiding) and a local encrypted password vault backed by SQLite, storing hashed credentials and tamper-evident security logs.
- ▶ Delivered a dark-themed, production-grade GUI using CustomTkinter, achieving a user-facing interface comparable to commercial security tooling.

JusticeGPT — AI Legal Assistant for Indian Citizens github.com/D5BU/JusticeGPT

2024

Python · Flask · TensorFlow · Keras · NLTK · Bootstrap 5

- ▶ Developed an NLP-powered legal chatbot trained to provide instant guidance on Indian legal processes including FIR filing, RTI procedures, Consumer Rights, and Cyber Crime.
- ▶ Trained a custom intent-classification model using TensorFlow/Keras on a hand-curated JSON dataset spanning 6+ distinct Indian legal domains, achieving accurate multi-topic query resolution.
- ▶ Built a full-stack web application with a Flask backend and a responsive Bootstrap 5 chat interface, plus an admin panel for live knowledge base editing without redeployment.

[JavaScript](#) · [HTML5](#) · [CSS3](#) · [GitHub Pages](#)

- ▶ Designed and shipped 5 browser-based interactive simulators covering sorting algorithms, logic gates, OSI model data encapsulation, brute-force attack vectors, and a retro cybersecurity arcade game — all hosted on a personal portfolio site.
- ▶ Built each lab as a standalone educational tool with live visualisation, making abstract security and computer architecture concepts accessible without any installation.

WORK EXPERIENCE

Freelance Graphic Designer

2021 – 2024

Self-Employed · Remote

- ▶ Delivered graphic design and visual asset creation services to clients across 3+ years, generating consistent monthly revenue of ₹7,000–8,000 while managing end-to-end client communication, scoping, and delivery.
- ▶ Operated as a sole business owner — sourcing clients, negotiating briefs, meeting deadlines independently, and building a sustained reputation for reliable delivery.

CERTIFICATIONS (IN PROGRESS)

AWS Certified Solutions Architect – Associate · Amazon Web Services · [Actively studying](#)

CompTIA Security+ · CompTIA · [Actively studying](#)

HashiCorp Certified: Terraform Associate · HashiCorp · [Actively studying](#)

INTERESTS

Space observation & stargazing · Gardening · Retro game modding (GTA IV graphics mods) · Open-source security tooling
